

Filtek™ P60 Posterior Restorative – Fast Cure Time and Excellent Performance

Key Features

- Superior Packability
- Fast Curing Time
- Low Shrinkage
- Excellent Wear Resistance and Strength
- Long-term Clinical Experience

The Dental Advisor awarded Filtek P60 “Best of 2003 Preferred Products” in the category “Packable”.

(Vol. 21, No. 1, January 2004)

With its speed and handling, it's way out front among posterior restoratives. And its stylish beauty makes it a winner with patients too.

Filtek™ P60 Posterior Restorative offers:

Superior Packability – Packs well without sticking to instrument. Excellent marginal adaptation and interproximal contact.

Easy Sculpting – With exceptional resistance to slumping.

Fastest Placement Technique – Takes only 20 seconds to cure an increment of 2.5mm.

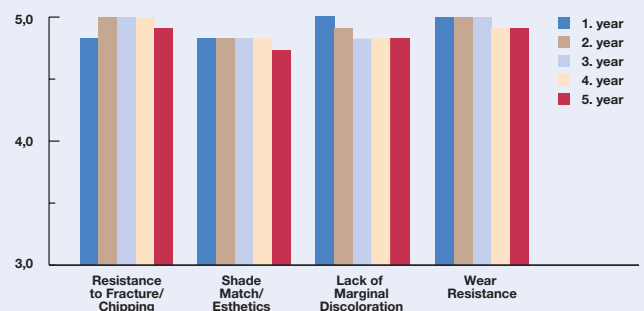

Low Polymerization

Shrinkage – Less stress on the tooth, less sensitivity potential for the patient.

Excellent Clinical

Performance – Filtek P60 was awarded five plus by The Dental Advisor (Vol. 21, No. 4, May 2004) due to the clinical quality of the restorations after five years in clinical service.

Clinical quality from 3M ESPE Filtek P60 over a five years recall period

Restorations were evaluated on a 1-5 rating scale: 1 = poor, 2 = fair, 3 = good, 4 = very good, 5 = excellent

Broaden Your Experience

3M ESPE offers a full set of materials and devices for composite restorations – from adhesives to finishing and polishing materials

The complete programme in an overview: the 3M ESPE Composite Navigator provides orientation and helps to select the best fitting option to your requirements. For further information on products and product families being part of the 3M ESPE Composite Navigator, please contact your 3M ESPE office.
