Harvard Cement normal setting

Zinc phosphate cement for permanent luting of crowns and bridges and for lining

Properties

- High compressive strength
- No curing shrinkage
- Good biocompatibility
- Easy and safe application
- Low film thickness
- Unmatched price performance ratio

The classic!
Clinically proven
since 1892

Harvard Cement quick setting

Zinc phosphate cement with reduced setting time for permanent luting of crowns and bridges

Properties

- High compressive strength
- No curing shrinkage
- Good biocompatibility
- Easy and safe application
- Low film thickness
- Fast setting
- Unmatched price performance ratio

Short
setting
time!

Indications of Harvard Cement

Harvard Cement normal setting, Harvard Cement quick setting and Harvard Cement OptiCaps®:

- For permanent luting of crowns and bridges, inlays and onlays on natural core and for luting supraconstructions on implants.

For crowns, bridges, inlays and onlays made of:

- zirconia
- aluminium oxide
- lithiumdisilicate
- silicate
- for conventional gold and non-precious metals

Harvard Cement normal setting additional qualified:

- For temporary fillings in posterior teeth
- As liner for all types of filling materials

Harvard Cement OptiCaps®

Zinc phosphate cement in capsules for permanent luting of crowns and bridges

Properties

- Consistent application with only 10 seconds mixing time
- Direct and precise application of creamy, Homogeneous cement on the restoration
- Avoids mistakes in mixing and dosing
- Sufficient for luting of 1 - 2 crowns from each capsule
- Working time of about 2 - 3 minutes

Optimal consistency & easy Handling

Harvard Polycarboxylat Cement

Polycarboxylate cement for permanent luting of crowns and bridges

Properties

- Better biocompatibility than phosphate cements
- Non irritant for sensitive teeth
- Less irritant to the pulp than zinc phosphate cement
- Easy and safe application
- Unmatched price-performance ratio for luting materials

Indications of Harvard Polycarboxylat Cement

- For permanent luting of crowns and bridges, inlays and onlays on natural core and for luting supraconstructions on implants.
For crowns, bridges, inlays and onlays made of:
 - zirconia
 - aluminium oxide
 - lithiumdisilicate
 - for conventional gold and non precious metals
- For temporary fillings in posterior teeth
- As liner for all types of filling materials
